Presents

An Evening with Dr. Devra Davis

*How cancer is caused by our workplaces
and environment
- and what we can do about it*

Dr. Devra Davis, head of the world's first Centre for Environmental
Oncology at the University of Pittsburgh Cancer
Institute and author of the book: **The Secret
History of the War on Cancer.**

Dr. Davis will examine how exposures in the workplace and in the broader environ-
ment are contributing to the cancer epidemic. And how we can take individual and
collective action to do something about it.

"I know what cancer looks and feels like. I have also come to know that much of the
disease can be prevented, if only we had paid attention to what some people have
been warning for years." – Dr. Devra Davis

Admission Free

Monday April 7, 2008, 7:00-9:00 pm

Location: OISE auditorium, 252 Bloor St. West (between St. George St. and Bedford Road)
